LIVE VIEWING

This DVR will normally be recording live images all the time irrespective of whether images are being played back or written to CD (unless specifically setup to use timers).

Password

If a password is required, press the password key followed by your six digit password. Then press the OK button to log you into the system. For example:

Viewing Full Screen Images

Press the live key to view live images on the main monitor. This key may be pressed at any time to exit from any other screen.

Select full screen views of different cameras on the main monitor by entering the camera number using the **NUMBER** keys:

Note: These keys may be used to step forwards or backwards through the cameras:

Spot Monitor

To choose the camera displayed on one of the spot monitors, press the **MON** key repeatedly to select which monitor is to be changed, then select a camera as described above. The selected spot monitor is shown at the bottom right of the screen just before the camera number. Nothing is displayed here if the main monitor is selected.

Multi Screen Displays

Press the Quad key to view 4 cameras on the monitor at once. Press the key again to see the next 4 cameras.

Press the Multi-screen key to view 9 cameras on the monitor at once. Press it again to view 16 cameras at once (maximum number of cameras depends on model of DVR)

FINDING IMAGES

If there is a CD in the CD drive with previously stored images on it, the DVR will replay from the CD. Otherwise, it will replay from the built-in hard drive.

FIND by Date/Time

This mode finds images by date and time. Press this key to enter the Date/Time search mode:

Note: Sometimes it is useful to press the TAG key when in search mode, to call up the latest available recorded images

Find by entering date and time

Use the **NUMBER** keys to enter any date and time for which there is still video available.

Note: The format for the date and time is **DD/MM/YY HH:MM:SS**

Find by Active Search

Scroll through dates and times using the left and right ARROW keys: then increase or decrease your specified variable using the up and down ARROW keys.

Note: As any digit of the date and time is changed, the corresponding image is immediately found on the hard drive and displayed. This is our "active search" facility.

PLAY

When you have found what you want, use the play keys to view the video:

Forwards or Play backwards keys multiple times to increase the viewing speed of the recorded images.

Key functions are: Step backwards, Play backwards, Pause, Play forwards, Step forward.

BURNING AN INCIDENT

To burn a section of video recording to CD, go to the middle section of the video or to the particular image that you wish to backup using the **FIND** and **PLAY** facilities as described in the **FINDING IMAGES** section. Then do the following:

Call up the **BURN-1** screen by pressing this key.

Note: If there is a CD in the CD drive that is *not* blank, the BURN screen will not be displayed.

Create an “incident” by pressing the **TAG** key.

Note: The time and Date selected on the **find screen** will be in the middle of this incident.

Change the duration of the incident as required using the left/right keys. Make sure the Size is equal or less than the CD capacity (typically 650Mbytes).

Note: The start and end times can also be individually set and multiple incidents may be burned onto a single CD. Please refer to the main manual for details or press the **HELP** key.

Less time recorded More time recorded

Press the  button on the CD drive to open the CD drawer and place a *new* CD-R in the CD drive. Press the button again to close the drawer.

IMPORTANT NOTE:
When an important incident has been written to a CD, always check that the CD plays back correctly, either by playing it on the DVR or on a PC

Start writing to the blank CD by pressing this key:
